Custom node sizes

Make sure provided dimensions are exact, not affected by node inset.

both

Node inset and outset

What 5mm inset should look like:

A diagram node with 5mm inset:

A diagram node with 5mm outset:

Circular insets:

Example

Make sure node or edge labels don't pick up equation numbers!

$$a^2 \quad (1)$$

$$b^2 \quad (2)$$

Axes configuration

Implicit from and to points

Edge positional arguments

Explicit named arguments versus implicit positional arguments.

Each row should be the same thing repeated.
