

Connectors

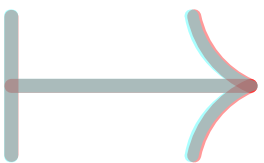

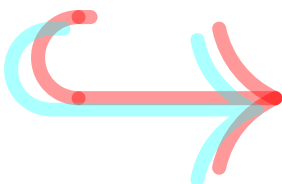

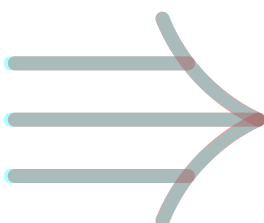

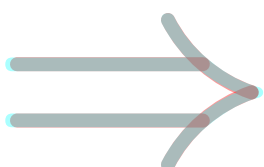

Arc connectors

Matching math arrows

Compare to \rightarrow , \Rightarrow , \implies , \twoheadrightarrow , \hookrightarrow , \mapsto .

Red is our output; cyan is reference symbol in default math font.

Double and triple lines

Diagram $A \xrightarrow{f} B$ and equation $A \rightarrow B$.

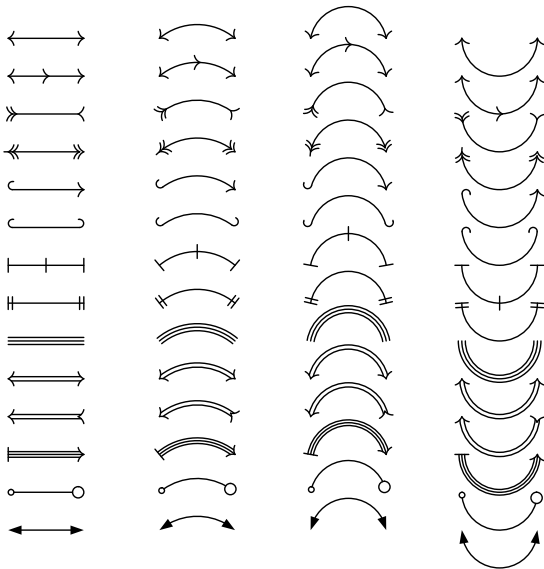

Diagram $A \xRightarrow{f} B$ and equation $A \Rightarrow B$.

Diagram $A \xRightarrow{\quad f \quad} B$ and equation $A \Rrightarrow B$.

Crossing connectors

edge() argument shorthands

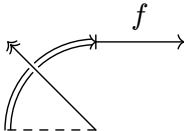

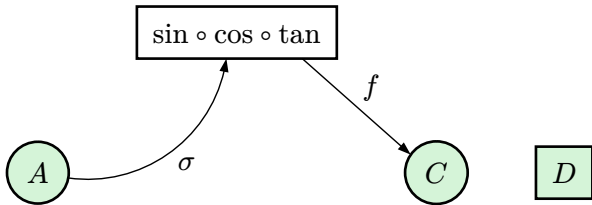

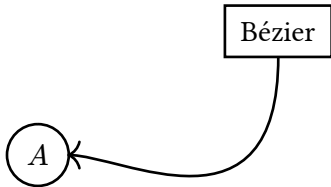

Diagram-level options

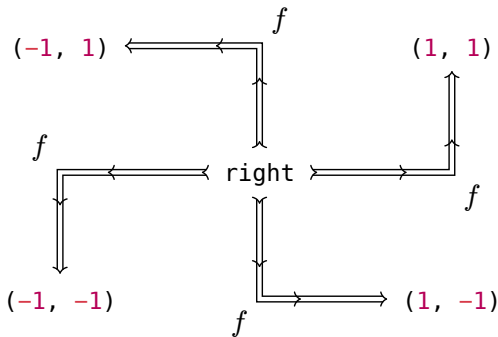

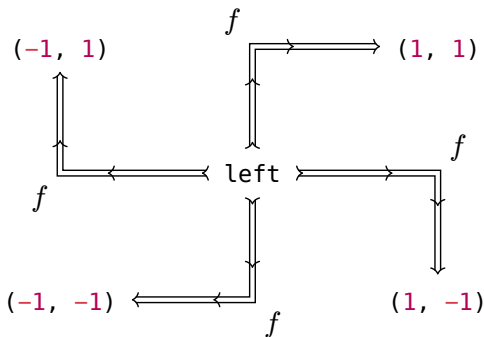

CeTZ integration

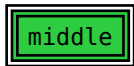

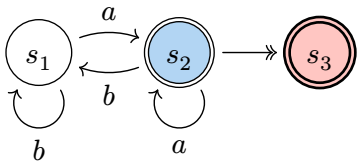

Node bounds

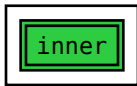

Corner edges

Double node strokes

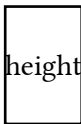

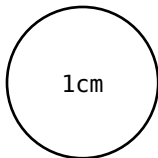

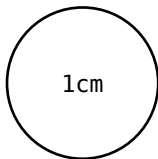

Relative and absolute extrusion lengths

Custom node sizes

Make sure provided dimensions are exact, not affected by node inset.

both

Example
